Recovery Partners Investments Limited

Recovery Partners Hires Top Name Fund CFO

Recovery Partners Investments Limited is pleased to announce that John Willson is joining the Company as Managing Director Finance and Administration. John will be responsible for all accountancy, financial control, budgeting, investor relations and systems and back office functions of the Fund.

John is a Chartered Accountant who at the outset of his career spent eight years with Clarkson Gordon (now Ernst & Young). Subsequently John joined Trimark Investment Management Inc. as its first CFO and also served as Senior Vice President of Administration. On leaving Trimark, he joined The Universal Group (now CI Funds Management) as Vice President in charge of their administration where he oversaw development of their transfer agency system and created their first limited partnership. During this period he became a key architect of FundSERV, the industry standard order-processing network. Later, as Chief Financial Officer of YMG Capital Management Inc., John oversaw its “going public” in a reverse takeover transaction. He has consulted to a number of companies in the software and financial services industries on compliance, finance and administrative matters as well as participating in start-up enterprises in both the mutual funds and software industries. In addition to his accountancy designation holds a B. Math. and an M. Math.

Alex Jurshevski, CEO of Recovery Partners Investments said: “We are very happy to welcome John on board. His addition to the team substantially completes our senior hires consistent with our business planning objectives. He brings a wealth of experience to this position and will add substantially to the team already in place.”

About Recovery Partners Investments Limited

Recovery Partners Investments Limited has established, **Marvels™**, a transactions platform capable of efficiently identifying, valuing, warehousing and processing eligible “off-strategy” bank assets that allows for high rates of throughput while featuring a low volatility/high risk-adjusted returns profile for these assets.

This platform intermediates investment flows between suppliers of distressed and non-core financial assets (e.g. the banks) and large scale institutional investors, principally pension funds, that are seeking diversification and higher risk-adjusted returns for the portfolios under their management.
